GINESYS retail software covers the entire multi-channel retail management process from procurement to inventory to point-of-sale. It includes production, sales & distribution, customer loyalty, and accounting.

It is robust enough to support many different verticals like apparel, consumer durables, fabrics, food and groceries, footwear, furnishings, jewellery and books. Our many satisfied customers testify to the seamless integration and flawless performance of the software in their line of business.

The following pages provide information on how to install and run GINESYS.
